## REMARKS

FYI

Julian —

Map.

Discussed with Bob this am. Asked him if there was anything we could do help. Answered this was organizational meeting and would call on as as things developed. I emphasized my support for his initiative.

MEMORANDUM FOR: See Distribution

FROM :

Deputy Director of Scientific and Weapons Research

SUBJECT : Creation of Future Systems Working Group

1. I would like to have a meeting to discuss the formation of a Future Systems Working Group and its role in helping OSWR address the future systems problem. I will attempt to provide some background and convey some of the concerns regarding OSWR's treatment of future systems which, hopefully, you can help resolve. [redacted]

2. A rather comprehensive list of candidate Soviet future systems was recently compiled [redacted] based on work done for NIE 11-12. The characteristics of these systems are such that they cut across division responsibilities and thorough analysis of them requires a multi-disciplinary approach. The need for a more indepth look at these systems was obvious in putting together the current 11-12 estimate. I would like to discuss how we might pare this list down to a "manageable few" on which indepth analysis can be performed. Following this, I would like to marshal the required resources to produce as complete assessment of these specific systems as is possible. [redacted]

3. I believe the future systems problem is one of the most difficult and important responsibilities of OSWR. It is also clear that the DCI is extremely interested in this subject. A meeting will be held in Room 4F31 on Tuesday, 17 April to get our effort started. Everyone involved on the attached distribution list should plan to attend. [redacted]
